

Project Guide:

LIGHTS, CAMERA, REVIEW

Reviewing Movies as a Family

This Movie Review project guide is a great way to encourage family bonding for parents, grandparents, and kids. By watching and discussing a movie together, family members can learn more about each other's interests and opinions. Additionally, this project helps to improve writing skills for kids, allowing them to practice critical thinking and analyzing the elements of a story. By working together to create the review, families can create a shared experience and a fun way to express their thoughts and opinions.

LET'S DO IT!

Watch a movie together and write a review, discussing the plot, characters, and themes. Choose a movie that everyone in the family can enjoy, and make sure to take notes during the movie to help you remember important details. After the movie is finished, take turns discussing your thoughts and opinions on the movie, and then work together to create a written review. You can use a word processor, blog platform, or even create a video review.

We hope you enjoyed this project guide and had fun watching a movie and writing a review together as a family. Don't forget to check out our website, **www.writewithyourkids.com**, for more project guides, activities, and our published books. We believe that writing can be a fun and enjoyable activity for families, and we're excited to share more ideas with you!
